GENERAL INFORMATION:
GENERAL INFORMATION:
TITLE OF INVENTION: Chlamydia pneumoniae genomic sequence and polypeptides, fragments
TITLE OF INVENTION: thereof and uses thereof, in particular for the diagnosis, preve
TITLE REFERENCE: 9710-003-999
CURRENT APPLICATION NUMBER: US/10/289,762
CURRENT FILING DATE: 2003-03-27
NUMBER OF SEQ ID NOS: 6849
SEQ ID NO 2388

GENERAL INFORMATION:
APPLICANT: Pharmacia Corporation
APPLICANT: Pharmacia Corporation
APPLICANT: Ross, Stuart Antisense Modulation Of Acyl-CoA Synthetase I Expression
TITLE OF INVENTION: Antisense Modulation Of Acyl-CoA Synthetase I Expression
FILE REFERENCE: 01294/1/PCT
CURRENT APPLICATION NUMBER: PCT/US03/25389
CURRENT FILING DATE: 2003-08-14
PRIOR FILING DATE: 2002-08-14
NUMBER OF SEQ ID NOS: 3624
SOFTWARE: Patentin version 3.2
SEQ ID NO 1106
LENGTH: 20

GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals Inc.
APPLICANT: Ribozyme Pharmaceuticals Inc.
TITLE OF INVENTION: Enzymatic Nucleic Acid Treatment of Diseases or Conditions Relate
TITLE OF INVENTION: Hepatitis C Virus Infection
FILE REPERENCE: MBHB00-801-F
CURRENT APPLICATION NUMBER: US/09/817,879
CURRENT FILING DATE: 2001-03-26
NUMBER OF SEQ ID NOS: 9703

GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: McSwiggen, James
TIPLEONT: McSwiggen, James
TIPLE OF INVENTION: Nucleic Acid Treatment of Diseases or Conditions Related to Level
FILE REFERENCE: 400/057 (MBHB01-1158-A)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Treatment of Diseases or Conditions Relate
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       .
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            0

Sequence 24, Application US/10016490C
Sequence 24, Application US/10016490C
GENERAL INFORMATION:
APPLICANT: Yin, James Q.
TITLE OF INVENTION: Methods for design and selection of short double-stranded
TITLE OF INVENTION: 0.1igonucleotides, and compounds of gene drugs
FILE REFERENCE: 01-2793
CURRENT FILIAGO BATE: 2002-11-22
NUMBER OF SEQ ID NOS: 51
SOFTWARE: PatentIn version 3.1
                                                                                                                    Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
